TRAILERS & EQUIPMENT

MAFI Equipment

Goosenecks, Parking Stands and Ballast Weights

With a wide range of equipment, MAFI Transport-Systeme GmbH is a real system supplier. MAFI offers various goosenecks and ballast weights for your heavy-duty tractor. And if you use a forklift, MAFI also has the right gooseneck for your forklift operation.

Gooseneck for Tractors

MAFI Goosenecks Type SH 36 / SH 45 / C-Hook

A MAFI gooseneck is used to pull roll / cargo trailers. A detachable gooseneck is only coupled onto the tractor's 5th wheel hitch when necessary, which means, the tractor remains flexible and can still be used to move semitrailers. The gooseneck is selected based on the fifth wheel capacity of the tractor. System loads of up to 250 tons are possible.

Container Chassis

MAFI Container Chassis

Container chassis are used to transport standard ISO containers within seaports. The containers are lowered from the ship onto the chassis, which is coupled to a terminal tractor. The containers are distributed or reloaded inside the port terminal. Container Chassis are available in lengths of up to 45 feet. The payload can be up to 70 tons. Container chassis are available in different versions depending on customer requirements. They can be delivered as bump carts, with twist locks or with centering pins. Various options such as air brakes, rear lights, ladders etc. are also available.

Roll / Cargotrailer

MAFI Roll / Cargo Trailers

Roll / Cargo trailers can be used to transport various goods with payloads of up to 250 tons. Common sizes are 20, 30 or 40 feet. The various options that are available allow the trailers to be designed for a specific transport task. The platform size can be customized and can be delivered with a wood or steel deck or simply as a skeletal frame. Twist locks, stanchions, lashing rings and corner guides are also available. The running gears are either equipped with solid rubber tires or with super elastic tires. The advantages of the system are simple and versatile handling, the robust, low-maintenance design, and the fact that they provide a solution for the efficient transport and mobile storage of goods.
