TRAILERS & EQUIPMENT

Container Chassis

MAFI Container Chassis

Container chassis are used to transport standard ISO containers within seaports. The containers are lowered from the ship onto the chassis, which is coupled to a terminal tractor. The containers are distributed or reloaded inside the port terminal. Container Chassis are available in lengths of up to 45 feet. The payload can be up to 70 tons. Container chassis are available in different versions depending on customer requirements. They can be delivered as bump carts, with twist locks or with centering pins. Various options such as air brakes, rear lights, ladders etc. are also available.

Roll / Cargotrailer

MAFI Roll / Cargo Trailers

Roll / Cargo trailers can be used to transport various goods with payloads of up to 250 tons. Common sizes are 20, 30 or 40 feet. The various options that are available allow the trailers to be designed for a specific transport task. The platform size can be customized and can be delivered with a wood or steel deck or simply as a skeletal frame. Twist locks, stanchions, lashing rings and corner guides are also available. The running gears are either equipped with solid rubber tires or with super elastic tires. The advantages of the system are simple and versatile handling, the robust, low-maintenance design, and the fact that they provide a solution for the efficient transport and mobile storage of goods.

MAFI Transport-Systeme GmbH Tauberbischofsheim

MAFI Transport-Systeme GmbH specializes in the design and manufacture of heavy-duty vehicles for transporting containers, semi-trailers, cargo / roll trailers and container chassis for ports and industry.

MAFI considers itself to be a system supplier, offering the appropriate trailers and roll / cargo trailers for distribution, industry and seaports.

In the 1960s, MAFI developed the RoRo system (Roll on / Roll off) and set the standard for efficient and economical loading and unloading of ships. The roll / cargo trailer system consisting of a tractor, gooseneck and roll / cargo trailer revolutionized the handling of goods in seaports worldwide. This development led to a drastic reduction in loading and unloading times. Customers appreciate the high-quality, flexible solutions of that MAFI provides for their transport tasks.

The customer base includes manufacturers, suppliers and service providers from the automotive, steel, aluminium & paper industries, as well as logistics centres and international air and seaports.
